Integration for Oracle's PRIMAVERA P

For IPM Project Management

www.ipmglobal.net

ipm

Do you manage projects with multiple schedule activities?
Do you need to track and record project expenses against your schedule?
Do you want to view all of your project information in the one place?

WHAT DOES PRIMAVERA P6 INTEGRATION DO?

Further extend your project management capabilities with IPM's new integration tool for Oracle® Primavera P6. Integration with Primavera P6 is an additional product available in the IPM suite for those wishing to extend both their IPM and Primavera capabilities. IPM users without any scheduling skills can progress activities and record actual costs.

With Primavera P6 integration for IPM the two systems complement each other and ensure you always have a 360° view of your project.

PRIMAVERA P6 INTEGRATION NOW GIVES YOU THE ABILITY TO:

- Synchronize job activity information between Primavera P6 and IPM
- Effectively progress schedule activities and completion dates in IPM
- Update labor, equipment, purchase order and subcontract information for each P6 activity in IPM
- Synchronize this information back to Primavera P6 to accurately record and track expenses information for your project
